Reduce Costs on Safety Supplies, PPE, MRO, Tools, etc...

Whether you are running a manned storeroom, utilizing the honour system, or keeping your supplies under lock and key, the overall average reduction in spending is approximately 30% per year (based on reports from existing users).

Reduce Inventory Levels

Real time inventory reports allow you to monitor your inventory levels, which results in more timely restocks. Supplies are always readily available and only replenished when needed.

Eliminate Theft, Wastage & Hoarding

CIPG Vending Machines make all of your employees accountable for the items they use. Real time inventory reports results in more timely restocks and increases employee's confidence that the products they need, will be available when they need them.

Improve Inventory Turn Rates

Our vending inventory machines stock from back to front, making sure that your inventory is always rotating.

Automate & Digitize Your Inventory

Access to numerous reports in real time eliminates the need to do manual inventory counts. Automated re-ordering reduces paper, ink/toner and processing.

Reduce Material & Tool Retrieval Time

Ever thought about how much time it takes your employees to get the supplies that they need and get back to work? In some instances, it can take up to 30 minutes. This downtime costs manufacturers millions of dollars each and every year. Strategically located CIPG Vending Machines will give your employees easy access to the supplies that they need, and get them back to work in a matter of seconds.

Available 24/7

Our vending system is always available to distribute supplies. The employee simply walks up to the machine, enters a PIN number, holds their ekey to the reader, makes their selection, and gets back to work quickly.
